KERATILES CERAMIC

about Company

Earthen Tile has been produced in Thailand several decades ago starting from a capitalist group realizing that the clay was so very rich in Lampang Province, northern of Thailand. The group had started producing the earthen tile which is unique and is the origin of the traditional handmade "earthen tile" which are beautiful but unstable, uneven quality and features. With knowledge and long experience in the pottery tile industry, the founder of Kerolux Ceramic Co., Ltd. has the idea in combining the beautiful art work with advanced manufacturing technology to be used in the production of vitreous tiles. They are characterized by high quality but still retaining the beautiful handmade original style.

Therefore, Kerolux Ceramic Co., Ltd. becomes the leading manufacturer of the country who can produce vitreous tiles in the new style to be fired at high temperatures resulting with consistent quality, high strength, accurate size, low distortion, low water absorption, glossy and bright color and natural looks. Especially the crack of the tile is the unique beauty of our "Kerolux" tile also to the previous level. Currently there are more than 290 shades we produce.

Our company focuses on the development of new products continually to the market to serve to various demands of the consumers. The quality is certified with the international standard of ISO 9001 and the company also has been awarded with the quality symbol of "Thailand Trust Mark" from Department of International Trade Promotion, Ministry of Commerce. Our manufacturing is friendly to the green environment by recycling the waste such as glass which is reuse as the raw material up to 30% in the production process. This can reduce the use of natural resources affecting the environment and we also emphasize to receive the accreditation of standard of ISO 14001 as well. At present, we distribute our products through more than 400 dealers continuously and export to more than 30 countries across the world in Asia, Middle East, Australia, and Europe.

INSTALLATION คำแนะนำติดตั้งกระเบื้อง

1. Measure the area to be covered with the film. Fix the starting point by allowing a line for film vertically and horizontally. Adjust the level for the floor or the wall as required and clean the fixing area to remove the dirt.
2. Cut off at least 3-5 cm of the end and then before start fixing.
3. Mix the cement mortar and apply using the flat side of the trowel.
4. Apply the cement mortar and use the notched roller on the film area with approximately 3 mm thickness. Use the trowel to scrape the glued cement.
5. Place the film as per the pattern, beginning at the starting corner. Place the film moved by the sliding and tap lightly with rubber hammer or trowel. Separate or adjust the position of the film orderly.
6. Before grouting, allow the film to dry for about 48 hours. Use the trowel to remove excess grout from the film. After that, clean the joint between the film.

1. 2. วัดขนาดพื้นที่ที่จะติดตั้ง ทุบผิวพื้นผิวให้เรียบและปรับระดับทั้งแนวตั้งและแนวนอน โดยให้เส้นตั้งและแนวนอนเป็นแนวตั้งและแนวนอนตามลำดับ
2. ตัดปลายด้านหนึ่งออกประมาณ 3-5 เซนติเมตรก่อนเริ่มติดตั้ง
3. ผสมปูนกับทรายและใช้ปูนฉาบด้านเรียบ
4. ฉาบปูนบนพื้นผิวที่เตรียมไว้แล้ว ใช้ลูกกลิ้งด้านเรียบโรยปูนบนฟิล์มด้วยขนาดประมาณ 3 มม. ใช้เกรียงขูดปูนที่ติดฟิล์มออก
5. วางแผ่นฟิล์มตามแบบที่กำหนด โดยเริ่มติดตั้งที่มุมของพื้นที่ที่จะติดตั้งและใช้ค้อนยางหรือค้อนเหล็กตบฟิล์มให้เรียบและปรับตำแหน่งฟิล์มให้ตรงตามแบบที่กำหนด
6. รอปูนแห้งสนิทประมาณ 48 ชั่วโมงก่อนปูนทับ และใช้เกรียงขูดปูนส่วนเกินออกจากฟิล์ม หลังจากนั้นทำความสะอาดรอยต่อระหว่างฟิล์ม

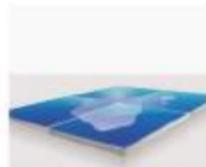

SPECIFICATION

DIMENSIONS : MM.

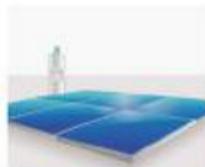

Length and Width in roll (ม้วน) 2000x1000mm
 Thickness (ความหนา) ±12%

PHYSICAL PROPERTIES

NEW KERAOL

Water Absorption (การดูดน้ำ) <2%
 Modulus of Rupture (แรงดึง) 2.15

CHEMICAL PROPERTIES

Resistance to Household Chemicals and Swimming Pool Salt (ทนกรดทนด่างและน้ำเกลือ) Good (ดี)

Length and Width in roll (ม้วน) 2000x1000mm
 Thickness (ความหนา) ±12%

Water Absorption (การดูดน้ำ) <2%
 Modulus of Rupture (แรงดึง) 2.15

ANTIQUE

Resistance to Household Chemicals and Swimming Pool Salt (ทนกรดทนด่างและน้ำเกลือ) Good (ดี)

Cement film is a special product with slightly different use compared to other products. It is necessary to use primer on the base before cement during installation. In case of film in a swimming pool, you need to help it stick to the base first and block area, and use the roller with Water Proof roller using a brush to spread it. Let coated film get dry before or waiting until the film is completely dry. Use of wire is not recommended for coating film/grading area.

ฟิล์มปูนเป็นผลิตภัณฑ์พิเศษที่มีลักษณะการใช้งานแตกต่างจากผลิตภัณฑ์อื่นอยู่เล็กน้อย จำเป็นต้องใช้ปูนรองพื้นก่อนการฉาบปูนระหว่างการติดตั้ง ในกรณีของฟิล์มในสระว่ายน้ำ จำเป็นต้องช่วยฟิล์มติดกับพื้นก่อนและปิดกั้นพื้นที่ และใช้ลูกกลิ้งโรยฟิล์มด้วยลูกกลิ้งเคลือบน้ำยาป้องกันน้ำซึม และใช้แปรงช่วยการกระจายฟิล์มให้ทั่วก่อนปล่อยให้ฟิล์มแห้งสนิท หรือรอจนฟิล์มแห้งสนิทก่อนการปูทับ
